PROFESSIONAL SUMMARY

GIS & AI Systems Architect specializing in enterprise data modernization, spatial systems, and intelligent automation. With over 20 years of IT experience, I design and implement scalable GIS and AI-driven data systems that transform fragmented operational environments into structured, decision-ready platforms.

Expert in architecting ArcGIS Enterprise environments, developing Python and SQL-based ETL pipelines, and integrating AI-driven automation frameworks that improve data integrity, operational efficiency, and real-time decision-making.

Recognized for delivering scalable, intelligent systems that bridge GIS, enterprise data architecture, and AI-driven automation to solve complex operational challenges.

Known for transforming fragmented data environments into structured, intelligent systems that drive operational clarity and decision-making.

TECHNICAL SKILLS

• ArcGIS Enterprise, ArcGIS Pro, ArcGIS Online
• Python, SQL Server, Spatial ETL, REST APIs
• AI-Driven Automation, Workflow Architecture, Data Orchestration
• Data Integration, Database Design, Data Governance, QA/QC Frameworks
• Location Intelligence, Web GIS Applications, Reporting Dashboards

PROJECTS & PORTFOLIO

GitHub Portfolio: https://github.com/Omoluabi1003

• ETL-AI – Intelligent Data Pipeline & Automation Framework

Architected a modular ETL framework integrating **AI-driven validation and enrichment**, enabling scalable ingestion, transformation, and processing across enterprise and GIS systems.

• • PtMatch – GIS Data Validation & Point Matching Engine

Developed a spatial validation engine improving **address matching accuracy**, eliminating inconsistencies, and strengthening enterprise GIS data integrity.

• Ariyo AI – Intelligent Music & Streaming Platform

Built an AI-powered platform enabling **dynamic content generation, real-time streaming, and personalized interaction**, demonstrating full-stack system design and AI integration.

• Developed multiple web-based applications integrating APIs, spatial visualization, and user workflows, demonstrating product-level engineering and system thinking.

PROFESSIONAL EXPERIENCE

GIS Consultant | ETL GIS Consulting LLC – Okeechobee, FL | 10/2025 – Present

• Led enterprise data modernization initiatives transforming fragmented operational data into structured, scalable systems
• Architected **ArcGIS Enterprise environments** and multiuser geodatabases supporting cross-departmental workflows
• Designed **Python and SQL-based ETL pipelines** improving data processing efficiency, consistency, and reliability
• Developed automation frameworks eliminating repetitive manual processes and reducing operational workload
• Implemented **AI-assisted validation frameworks** enhancing data governance and accessibility
• Established QA/QC frameworks ensuring data integrity and long-term system reliability

GIS Specialist | St. Lucie County Board of County Commissioners – Fort Pierce, FL | 01/2024 – 10/2025

• Supported enterprise GIS operations for zoning, land use, and development review
• Built web GIS applications and dashboards delivering real-time regulatory and property intelligence
• Designed automated spatial workflows improving processing speed and consistency
• Integrated GIS with SQL Server systems enabling data-driven decision-making
• Collaborated across departments aligning GIS with operational and regulatory workflows

GIS Technician | St. Lucie County Board of County Commissioners – Fort Pierce, FL | 11/2021 – 12/2023

• Maintained enterprise geospatial databases supporting multi-departmental operations
• Produced analytical and cartographic outputs supporting planning and infrastructure initiatives
• Supported deployment of web GIS applications improving accessibility and performance
• Standardized spatial data and metadata improving long-term data consistency

Database Administrator (Contract) | Manpower – St. Lucie County – Fort Pierce, FL | 12/2019 – 11/2021

• Led migration of legacy planning and permitting records into a structured, GIS-integrated repository
• Designed metadata standards and indexing frameworks enabling efficient data retrieval
• Digitized and structured large-scale records supporting spatial analysis and validation
• Collaborated with planning teams aligning data systems with operational workflows

SELECTED ACHIEVEMENTS

• Reduced manual GIS processing effort by ~30% through automation frameworks, improving operational efficiency

• Transformed legacy records into **GIS-integrated systems** enabling rapid retrieval and analysis

• Designed scalable geospatial architectures supporting **cross-departmental decision-making**

• Enhanced data accessibility and reporting through **GIS and database integration strategies**

EDUCATION

Bachelor of Science, Medical Laboratory Technology – University of Uyo, Nigeria

CERTIFICATIONS

• AI-Powered Automated Workflows – University of South Florida / Ziplines (2025)
• AI Prompt Engineering – University of South Florida / Ziplines (2025)
• Spatial Data Science: The New Frontier in Analytics – Esri (2024)
• Transform AEC Projects with GIS and BIM – Esri (2024)
• Cartography – Esri (2023)
• Going Places with Spatial Analysis – Esri (2022)
• Querying Data with Transact-SQL – Microsoft New Horizons (2021)

AWARDS AND HONORS

• Marquis Who’s Who Honoree (2025)
• Entrepreneur of Impact Nominee (2026)
• Against All Odds Award (2006)
